

REMOVE TOUGH LIME SCALE BUILDUP

Ecolab Delimers

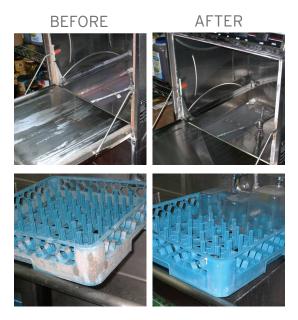

A buildup of lime scale in your dishmachine, on warewashing racks and surrounding stainless steel is not only unsightly, it can also cause damage to your kitchen equipment, drive up energy costs and leave a cloudy film on your tableware.

- ▲ Remove hard water deposits
- Extend equipment life and help prevent costly repairs
- Increase the efficiency of heat transfer surfaces, reducing energy costs

Solutions to help keep dishmachines, racks, steam tables and stainless steel surfaces sparkling clean

Four distinct Ecolab deliming products provide solutions to tackle every warewashing challenge resulting from hard water and lime scale deposits
